

AIREX[®]
Professional exercise line

**UPGRADE
YOUR LIFE**

"AIREX® products offer countless possibilities to improve your fitness: Upgrade your life!"

A new measure of function and comfort

New formula for effective hygienic protection

In response to increased hygiene needs, a new antibacterial agent was added to the innovative AIREX® material. Even antibiotic-resistant and highly aggressive CA-MRSA bacteria, frequently found in hospitals, fitness facilities and child daycare centers, will succumb to this effective hygienic protection. The improved hygiene formula of the new AIREX® mats, Coronella 200 and Corona 200, leaves germs without a chance.

Sustainability through durability

Extensive research with new components enabled AIREX® to significantly further improve the life and durability of its mats for indoor, outdoor and water use. Naturally, all materials are REACH-compatible and therefore comply with current requirements.

Experienced and innovative

AIREX® mats with their typical horizontal stripes are widely known – the original and clearly the Number One among therapy, sports and exercise mats for over 50 years. Extensive experience, the know-how of the industry leader and Swiss premium quality, enhanced by the valuable support of medical experts, physiotherapists, fitness specialists, competitive athletes, and recreational sports organizations, all have an obvious impact on the development of AIREX® products.

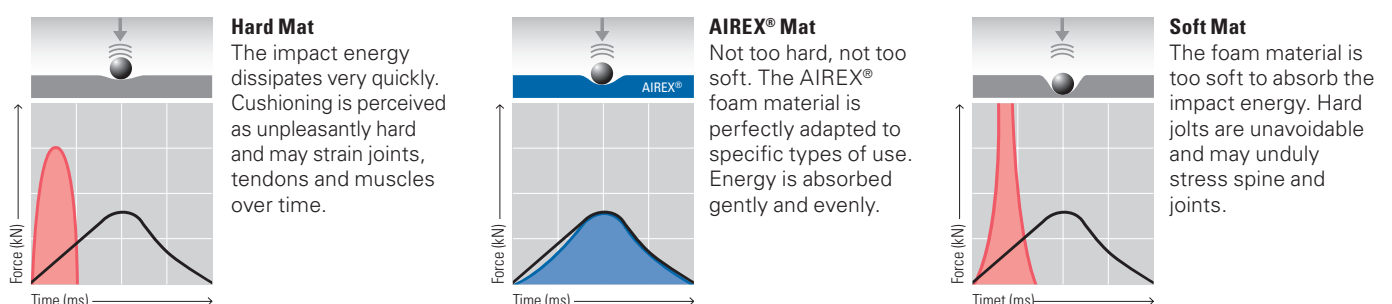

New colors and new sizes

AIREX® also makes a difference when it comes to style and comfort. The range of colors now includes sophisticated charcoal, platinum-grey and terra. The understated look of the new AIREX® mats perfectly complements the latest interior design concepts.

The new Coronella 200 and Corona 200 mats also meet the demand for larger sizes: at 200 cm they are long enough to accommodate anybody.

Noticeable improvement

It took years of hard work to develop the innovative, closed-cell foam material of AIREX® mats. The material is highly wear-resistant and supportive while at the same time warm, soft and cushioning. Exceptionally effective and gentle on joints, tendons and muscles.

“My clients expect variety in training. AIREX® products offer the best basis for this.”

Premium quality for any type of use

Easy and multifunctional

Premium quality and versatility make AIREX® products an ideal basis for any kind of training. Since they flatten out quickly, AIREX® mats and balance products are instantly ready for a wide variety of training programs and exercises and offer endless possibilities for new workouts.

Indoors, outdoors and in the water – the indestructible AIREX® products are a must for any training. The material is flexible and always stays in top shape, just like you if you keep using it.

Pleasant and safe

New athletic activities and training forms are setting high standards for the material. It should be easy to use, flexible, pleasant, safe, robust, and as versatile as possible. The exercise mats and balance products of world market leader AIREX® meet these criteria.

AIREX® products offer optimal support and prevent painful slips on slick gym floors. The superior surfaces of mats and balance products feel pleasantly soft and warm. The excellent cushioning properties of the material are easy on joints, tendons and muscles; training becomes more effective and enjoyable – and perhaps more frequent.

Versatile

Fitness and wellness, team sports, physical education or therapy – the use of AIREX® products will noticeably improve your physical agility. Upgrade your life!

Coronella 200 and Corona 200 offer countless advantages
